FROM TWEENS TO TEENS

PREPARING OUR CHILDREN FOR

SECONDARY EDUCATION

Moving from primary to secondary education can be a daunting phase for our children. Faced with a **greater number of subjects** to manage, a **new school environment** to get used to, **new friendships** to forge, and a slew of **physical, emotional and mental changes** that come along with puberty, children will greatly benefit from their parents' support in helping them make this transition smoothly.

Through this workshop, we hope that participants can:

1. Receive comprehensive coverage on the pertinent matters to consider in helping their children settle into secondary school and teenagerhood
2. Be inspired to look beyond the settling in and prepare their children for future success
3. Be equipped with a set of age-appropriate strategies to intentionally shape their children in the new season of their lives

“ This workshop provided pointers to handle the changes our kids are going to go through in their secondary school years. ”

“ This has inspired me to keep on updating myself in my approaches, so that I can build better relationships with my children and influence them positively. ”
